

## What Independent Study Looks Like In...*Applied Science*

1. Re-write your notes.
2. Review the last chapter of the text book, and read ahead to the next.
3. Answer the additional questions in the text.
4. Read around the subject content online to broaden your knowledge and understanding.
5. Review what we have covered in lesson that week, then the previous week and the previous month.
6. Reorganise your folder to make sure everything flows and is easy to revise from.
7. Complete past exam questions and active learn online.
8. Write out all the stages in carrying out an investigation and start applying these to new situations you come across daily to become more familiar with them.
9. Combine your notes, the text book and revision guide information to create your own "Need to Knows" for each unit.
10. Regularly test yourself (and class mates) with the unit 1 and 3 content. Ask verbal and written questions, create a kahoot or flash cards.
