

Assessor's Name	Rebecca Ardern	Assessment Date	16 th May 2021	
Description of process, activity or task to be risk assessed				
Describe the location where the activities are taking place	Saltash Community School is a secondary school for students of mixed ability. with 1257 students aged 11-18, with up to 120 staff and contractors, plus visitors that come and go throughout the school day. The site comprises an original and extended main building with newer outbuildings of single storey construction. There are extensive playing fields and green space.			
Describe the activities being performed	<ul style="list-style-type: none"> • place of work • education • dining • emergency response • safeguarding of vulnerable groups • travel to and from school 			
Describe the equipment and/or substances being used	<p>Substance: Coronavirus COVID-19 (risk and control measures apply to all types of respiratory viruses, but focus of this assessment is on the novel COVID-19 strain, for which information remains limited, although immunisation and treatment pathways have been developed but are in their early stages of deployment, resulting in a specific and increased risk compared with established strains of coronaviruses).</p> <p>Equipment: PPE, educational resources, IT and comms, machinery, kitchen appliances, hand tools, water fountains, vehicles, cutlery and utensils</p>			
Describe the people involved in these activities (and others who might be affected)	<p>Adults (A), including: directly employed staff; contracted staff; volunteers; visiting adults</p> <p>Young people and children (YPC), including: School students (aged 11-16); visiting students (aged 5-18); visiting children and young people (aged 0-18); unborn child</p> <p>Pregnant woman (PW) - pregnant A or YPC under 28 weeks' gestation and with no known underlying health conditions</p> <p>Clinically vulnerable, with a pre-existing medical condition (CVA or CVYPC), including: A or YPC with a pre-existing condition that would potentially put them at elevated impact having contracted COVID-19</p> <p>Adult 60 or over (A60+) – those aged 60 or over have been identified as being at higher risk of severe illness from coronavirus</p> <p>A or YPC from a black, Asian or minority ethnic (BAME) ethnicity group (BAMEA or BAMEYPC)</p> <p>Clinically extremely vulnerable, with chronic pre-existing medical condition (CEVA or CEVYPC), including: A or YPC , including a pregnant A or YPC with a chronic pre-existing condition that would potentially put them at critical impact having contracted COVID-19 CEV status applies to those people on the shielded patient list</p> <p>Living with a clinically vulnerable person (LWCV), including: A or YPC who shares a household bubble with a person that has a pre-existing condition that would potentially put them at elevated impact having contracted COVID-19, should the A or YPC contract the virus in school</p> <p>Living with someone from a BAME ethnicity group (LWBAME), including: A or YPC who shares a household bubble with someone from a BAME ethnicity group that would potentially put them at elevated impact having contracted COVID-19, should the A or YPC contract the virus in school</p>			

	<p>Living with a clinically extremely vulnerable person (LWCEV), including: A or YPC who shares a household bubble with a person that has a chronic pre-existing condition that would potentially put them at critical impact having contracted COVID-19, should the A or YPC contract the virus in school.</p> <p>Living with adult 60 or over (LWA60+), including: A or YPC who shares a household bubble with a person that is aged 60 or over that would potentially put them at elevated impact having contracted COVID-19, should the A or YPC contract the virus in school</p>
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Description of hazard and hazardous event		Who might be harmed?	What risk controls are currently in place?	Current risk rating*			Are further controls needed?	Date to be completed by	Residual risk rating*		
				L	C	R			L	C	R
Location	Contraction of COVID-19 - transmission of COVID-19 through contact with surfaces (indirect transmission)	PW	Undertake personalised risk assessment with line manager, following guidance by Royal College of Obstetrics and Gynaecology	1	5	5	PW and line manager to read guidance by Royal College of Obstetrics and Gynaecology (and sign up for updates), noting that vulnerability increases from 28 weeks' gestation		1	5	5
		CEVYPC	Students under paediatric or NHS care that have been advised specifically by their GP or clinician not to attend school must learn from home	1	5	5			1	5	5
		CEVA	Work from home wherever possible and only attend the workplace if all mitigation measures can be achieved at all times	1	5	5			1	5	5
		A YPC PW CVA CVYPC A60+ BAMEA BAMEYPC LWCV LWCEV LWBAME	Staff are required to be in school	1	5	5			1	5	5

Activities	Contraction of COVID-19 - transmission of COVID-19 through contact with people (direct transmission)	PW	Undertake personalised risk assessment with line manager, following guidance by Royal College of Obstetrics and Gynaecology	1	5	5	PW and line manager to read guidance by Royal College of Obstetrics and Gynaecology and sign up for updates noting that vulnerability increases from 28 weeks' gestation		1	5	5
		CEVYPC	Students under paediatric or NHS care that have been advised specifically by their GP or clinician not to attend school must learn from home	1	5	5			1	5	5
		CEVA	Work from home wherever possible and only attend the workplace if all mitigation measures can be achieved at all times	1	5	5	Ensure adhere strictly to social distancing protocols Allocate to least-populated spaces/least-contact roles		1	5	5
		A YPC PW CVA	Staff are required to be in school.	1	5	5			1	5	5
		CVYPC A60+ BAMEA	Maintain a culture of alertness and a mindset through our safeguarding mantra of "it could happen here"	2	5	10	Promote the mantra via letters to parents/carers, emails to staff, induction, virtual assemblies, PSHCE		2	5	10

		BAMEYPC LWCV LWCEV LWBAME LWA60+	Reinvigorate campaign to provide advice on hygiene, following the guidance issued by the National Institute of Clinical Excellence - e-Bug resources - wash or sanitise hands more regularly throughout the day (as a minimum: boarding/alighting transport, putting on/taking off face coverings, on arrival/departure, after using the toilet, before/after eating) Students and staff should avoid touching their mouth, eyes and nose Should students or staff feel the need to cough or sneeze, they must ensure they cover their mouth and nose, preferably using a tissue, but in an emergency they should use the bend of their elbow or cover with clothing, washing or sanitising their hands immediately after and disposing of tissues appropriately. Reinforce the 'catch, it bin it, kill it' approach	2	5	10	Staff, students and members of their households are strongly encouraged to access the asymptomatic rapid testing: Regular twice weekly testing of staff, students and their household members using lateral flow tests will break the chain of transmission and further reduce the risk			2	5	10
			Extensive hand sanitiser dispensers around the site in each classroom, corridor and entrance point - monitor to ensure they are filled and functioning	2	5	10				2	5	10
			Monitor all soap dispensers in toilet and sink areas to ensure they are filled and functioning	2	5	10				2	5	10

			<p>Any staff, student or visitor presenting with any of the COVID-19 symptoms must stay away from the School for 10 days, with the remainder of their household bubble isolating for 10 days and following prevailing published guidance – the isolation period starts on the day after exposure, a PCR or lateral flow test or the start of symptoms.</p>	1	5	5	<p>For those that display symptoms or receive a positive home LFT test result, arrange for PCR testing in line with government guidance</p> <p>- if PCR was taken within 2 days of a lateral flow test and negative then return and cease household bubble isolation (as long as nobody else is displaying symptoms)</p> <p>- if PCR is positive (or if negative, but taken more than 2 days after a lateral flow test) continue with isolation in line with published guidance. If person testing positive has accessed our site recently, they should inform the school and we will contact the local health protection team immediately, who will undertake a rapid risk assessment to determine who else might need to isolate as a precaution. This could mean sending a tutor or year group bubble home.</p> <p>Anyone who has had any of the following types of contact with someone who has tested positive for coronavirus (COVID-19) with a PCR or LFD test:</p> <ul style="list-style-type: none"> • face-to-face contact including being coughed on or having a face-to-face conversation within one metre 	Ongoing	1	5	5
--	--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	---	---	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------	---	---	---

						<ul style="list-style-type: none"> • been within one metre for one minute or longer without face-to-face contact • sexual contacts • been within 2 metres of someone for more than 15 minutes (either as a one off contact, or added up together over one day) • travelled in the same vehicle or a plane <p>Should isolate for 10 days. Encourage all staff, students and their household members to participate in at-home asymptomatic testing to identify non-symptomatic cases</p> <p>Monitor official guidance and take necessary action in a timely manner</p>					
			Any staff, student or visitor who has anyone in their household bubble who is presenting with any symptoms of COVID-19 or has tested positive via a home test must stay away from the School for 10 days and follow prevailing published guidance - the isolation period starts on the day after exposure, a PCR or lateral flow test or the start of symptoms.	1	5	5	Strongly recommend household member has PCR test: - if negative then return and cease household bubble isolation (as long as nobody else is displaying symptoms) - if positive, continue with isolation in line with published guidance .		1	5	5

		<p>Any students or staff that travel abroad must ensure they follow the government guidance on quarantine</p> <p>Staff or students returning from a country that requires quarantine must isolate for 10 days before returning to the School</p> <p>A list of exempt countries can be found here - all other countries require self-isolation: the isolation period starts on the day of return.</p>	1	5	5			1	5	5
		<p>All staff and students must follow the advice of the NHS Test and Trace service or local health protection team - if contacted and advised to self-isolate they must stay away from school for 10 days, or until a clear PCR test result is received if they develop symptoms: the isolation period starts on the day after exposure, a PCR or lateral flow test or the start of symptoms.</p>	1	5	5			1	5	5

			<p>Ask visitors questions relating to :</p> <ul style="list-style-type: none"> • their health (any sign of any illness) • whether they or anyone in their household bubble is presenting with any symptoms of COVID-19 • whether they have been asked in the last 10 days to isolate by the national Test and Trace service or local health protection team • whether they have been a close contact of a confirmed positive case in the last 10 days • whether in the last 10 days they have returned from a country that requires quarantine <p>Refuse entry where appropriate (inform SLT)</p> <p>Offer essential visitors an on-site (ATS) lateral flow test and place them in Reception until the result is known</p> <p>Ask that visitors notify us if they develop symptoms or are confirmed positive within the subsequent 10 days</p>	1	1	5	Retain contact details of all visitors, in case we need to inform PHE/NHS Test and Trace in the event of an outbreak			1	1	5
			<p>Inform all staff and students that they must adhere to the latest government advice and guidance when not in school (social responsibility), and that any reported breaches will be investigated and could result in action being taken to restrict their access to the School</p>	2	5	10	Restrict access to the School for those people that deliberately or consistently breach the government guidance while out of school, thus increasing the risk to others in the learning community - stay away for 10 days			1	5	5

			Segregate anyone that develops symptoms during the school day or otherwise feels unwell, until such time that they can be collected. Unwell person to be offered a face mask to reduce the risk of transmission to others. Separate toilet (in LG corridor) to be allocated and deep-cleaned after use.	2	5	10	Staff to remain 2 metres away and where that is not achievable, to use appropriate PPE, including face mask for mouth and nose, eye protection, gloves and apron, particularly if coughing or sneezing or vomiting Staff to follow DfE guidance on safe use of PPE to reduce self-contamination Clean affected areas with household bleach (adhere to COSHH and risk assessment procedure for bleach)		1	5	5
			In an emergency situation, such as first aid or intervention to prevent self-harm or harm to others, staff may need to breach the recommended 2 metre separation	1	5	5	Staff to remain 2 metres away (e.g. use verbal commands) and where that is not achievable and the person is not presenting with COVID-19 symptoms, proceed with treatment without PPE and undertake sanitation measures on completion If the person is presenting with COVID-19 symptoms, and where the situation allows, use appropriate PPE, including face mask for mouth and nose, eye protection, gloves and apron, particularly if coughing or sneezing and undertake sanitation measures on completion		1	5	5

			Students and staff using school and public transport will follow the guidance issued by Cornwall Council , which is informed by the government guidance for passengers - this means that passengers must wear "face coverings"	2	5	10	Educate all students in the safe use, storage and disposal of face coverings		2	5	10
			Parents/carers should not transport students from outside of their household bubble	2	5	10			2	5	10

		<p>Implement whole-school social distancing and precautionary measures:</p> <ul style="list-style-type: none"> • Aim to maintain a personal space of 2m between students-staff and staff-staff and, wherever possible, between student-student • Where distancing is not achievable at 2m, revert to “1m plus” - aim for 2m but accept 1m for as short a time as possible • Where “1m plus” is not achievable, avoid close face to face contact and minimise the time spent within 1m of anyone – consider using a face covering or face shield • mark communal areas (e.g. corridors, pathways, playground) to indicate a 2m gap • Where 2m separation cannot be maintained in indoor communal areas/corridors, staff, pupils and visitors should wear a face covering and follow the guidance on the safe use of face coverings (accepting that some will have a valid exemption, for which it is not lawful to request evidence) • designated entrances/exits for staff and for specific student classes and increased 	2	5	10	Provide induction as additional students join the School	Ongoing	2	5	10
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	---	----	----------------------------------------------------------	---------	---	---	----

			<p>use of all external access points to dilute footfall</p> <ul style="list-style-type: none"> canteen areas will be allocated to each year group. KS4 and year 7 students to attend the canteen in their bubbles only one parent/carer per student for any meetings/visits School events can be held with the express permission of the Headteacher and subject to full risk assessment socially distanced CPD events where necessary, but examine alternatives carefully manage use of agency supply staff lettings to community groups subject to the express permission of the Headteacher postpone non-essential external visitors/contractors 								
			<p>In the case of emergency or evacuation, it may be necessary to dispense with the 2m rule and one-way system, if the situation dictates - use all available corridors and exits and wear face coverings</p>	1	5	5	<p>Restrict access to the School for those people that, after investigation, are found to be deliberately or consistently breaching the School's operating procedures and/or expectations while in school, thus increasing the risk to others in the learning community - remove from site and stay away for 10 days</p>		1	5	5

									1	5	5
			Classrooms and other spaces to be well ventilated at all times of occupation This needs to be balanced against the operating temperature within that space, so during the school day, shared spaces must have at least one window or external door open at all times Windows and doors will be closed by the site team at the end of the school day for fire and security purposes Students must not be asked to stand on desks, chairs or window sills to open or close windows - staff must ensure the appropriate equipment is used	1	5	5	Ventilation is a key measure and at this time of year can affect room temperatures, so staff and students should dress accordingly to maintain thermal comfort. If any room is persistently below 13°C, staff must inform SLT so that additional heating can be considered rather than closing the final window/external door Further windows or doors should be opened if it can be done without reducing the temperature of the room to below 16°C (13°C if pupils are engaged in physical activity) When a room is vacated (e.g. at student changeover, break, lunch and end of Period 5), as many windows as practical should be opened to ensure the room is fully ventilated in preparation for the next use		1	5	5
			Occasional, brief, transitory encounters of less than 2m is considered low risk and should not be cause for alarm	1	5	5			1	5	5
			Allocate specific toilets for staff and for student use.	1	5	5			1	5	5

			Configure all air conditioning in shared spaces so that recirculation is turned off and fresh air supply is turned on. Rooms that have controlled access assigned to a single person can still operate on recirculated air, e.g. server room	1	5	5			1	5	5
--	--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	---	---	--	--	---	---	---

		<p>Implement student-specific social distancing measures:</p> <p>Where student to student distancing is not achievable at “1m plus” for prolonged periods, students must be placed in a bubble structure and students are encouraged to wear facemasks:</p> <ul style="list-style-type: none"> - reduce footfall, including from lesson changeovers, by keeping students in a learning group bubble, in a single classroom (where possible) for all lesson periods and rotate the teacher - stagger lunch and break times and students to remain in their year group bubble - bubbles should not interact, or, where not achievable, interaction should be minimised, noting that prolonged interaction could result in the forming of a larger bubble - encourage outdoor activity at lunch and break times, within allocated areas (outside interaction carries a much reduced risk of transmission) - students to remain in their bubble during indoor lunch and break times - bubbles should not interact when indoors - lay out classrooms and learning spaces with desks facing forward - pre-planned classroom entry/exit routine - encourage outdoor activity at lunch and break times, within 	2	5	10	<p>Restrict access to the School for those students that, after investigation, are found to be deliberately or consistently breaching the School’s operating procedures and/or expectations while in school, thus increasing the risk to others in the learning community - remove from site and stay away for 10 days</p> <p>In line with government guidance, face coverings will be worn in indoor spaces where 2m separation cannot be maintained</p>				2	5	10
--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	---	----	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	---	---	----

		<p>year group bubbles as far as possible (outside interaction carries a much reduced risk of transmission)</p> <ul style="list-style-type: none">- allocate toilet areas on a bubble basis and allow only one student at a time per toilet area where possible- suspend use of lockers (which encourages social gathering) and allow bags in classrooms- manage arrival and departure of students to ensure appropriate separation and bubble structure is achieved while on school site- for close proximity (especially face to face) activities within PE lessons consider impact of elevated depth/rate of breathing from intense exercise and follow latest guidance from Association for Physical Education- undertake team sports only where national sporting governing bodies have developed approved guidance (such as grassroots sports guidance for safe provision including team sport, contact combat sport and organised sport events)- outdoor inter-school sports fixtures can be arranged with the express permission of the Headteacher- indoor inter-school sports fixtures can be arranged with the express permission of the Headteacher							
--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--	--

			<ul style="list-style-type: none"> - no whole school assemblies - School events can be held with the express permission of the Headteacher and subject to full risk assessment - no overseas visits - domestic overnight or residential trips can be arranged with the express permission of the Headteacher and subject to full risk assessment and adherence to the DfE guidance (Annex C) - no general activities involving shouting or singing - singing is permitted for curriculum or approved extra-curricular purposes, subject to rigorous controls and adherence to both the school-specific and the national guidance on singing: <ul style="list-style-type: none"> - people with symptoms suggestive of COVID-19, or who are known to have been in recent contact with others who have COVID-19, do not participate in singing or attend singing events; - singing takes place only in larger well-ventilated spaces, or outdoors; - singing is for limited periods of time at a reduced level of loudness, using microphones for amplification; - limited numbers of people sing together; 						
--	--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--

			- singers are spaced at least 2m apart in all directions, and should be positioned back-to-back or side-to-side whenever possible.								
			If social distancing protocols and other risk mitigation measures cannot be consistently maintained due to poor behaviours or an inability to comprehend or follow instructions, then consider risks to individual and the wider learning community	3	5	15	Assess specific or additional risks and develop specific or additional mitigating actions (additional to this risk assessment), including study in separate location. If risks cannot be suitably mitigated in the school environment, then student will have to study at home if individual or others are put at an unacceptable level of risk		1	5	5

		A YPC PW CVA CVYPC A60+ BAMEA BAMEYPC LWCV LWCEV LWBAME LWA60+ CEVYPC CEVA	Clean regularly and provide self-clean facility for all users of shared personal protective equipment (PPE) such as goggles and masks, shared IT, workstations and other shared equipment such as screens/keyboards/mice, shared musical instruments, whiteboards, touch-screen TVs, communal water fountains, signing in system, cashless catering devices, telephones, photocopiers	2	5	10			1	5	5

*Likelihood x Consequence = Risk (see Annex A)

Annex A

Risk Rating Calculator

Likelihood that hazardous event will occur	
1	very unlikely
2	unlikely
3	fairly likely
4	likely
5	very likely

Consequence of hazardous event	
1	insignificant – no injury
2	minor – minor injuries needing first aid
3	moderate – up to seven days’ absence
4	major – more than seven days’ absence
5	catastrophic – death

Action Level Table

Risk rating	Action
20–25	Stop – stop activity and take immediate action
15–16	Urgent action – take immediate action and stop activity if necessary, maintain existing controls rigorously
8–12	Action – improve within specified timescale
3–6	Monitor – look to improve at next review or if there is a significant change
1–2	No action – no further action but ensure controls are maintained and reviewed

Risk Scoring Grid

Likelihood	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
